

HAILEYESUS MESFIN

Software Developer | MERN Stack | Business Automation

Addis Ababa, Ethiopia | haileyesus2024@gmail.com | Phone 0989853281

PROFESSIONAL SUMMARY

Self-taught software developer with a Bachelor's Degree in Information and Communication Technology and professional experience in data-related operations, internal business tools, and process automation. Built AI-assisted MERN stack projects using React, Node.js, Express, and MongoDB, alongside practical automation for invoice processing and Shopify SEO workflows. Interested in developing secure, maintainable applications and strengthening independent debugging and software engineering skills.

TECHNICAL SKILLS

Frontend: HTML5, CSS3, JavaScript, React.js; exposure to Next.js

Backend & APIs: Node.js, Express.js, REST APIs, JWT authentication

Databases & tools: MongoDB, MySQL fundamentals, Git/GitHub, Postman, Replit, Vercel, Render

Automation & testing: Python, Selenium browser automation, Excel/Sheets data workflows, Playwright basics

PROFESSIONAL EXPERIENCE

Yosal PLC | Data Operations, Website & Automation Work | Addis Ababa

June 2024 - Present

- Support data-related and website workflows; analyze repetitive business processes and identify opportunities for improvement.
- Built an Order Issue Management System and a Rental Management System using Replit and AI-assisted development tools.
- Developed invoice extraction and processing automation to organize business data and reduce repetitive manual work.
- Worked on Shopify SEO browser automation using Selenium and Chrome to automate repetitive tasks.
- Worked with spreadsheets, structured data, JSON, and internal workflow requirements.

SELECTED DEVELOPMENT PROJECTS

Task Management System | MERN Stack | Live application

- Built an AI-assisted full-stack task application using React, Express, Node.js, and MongoDB, with JWT-based authentication, role-aware workflows, CRUD operations, and REST API integration.
- Worked on API testing, validation, deployment, and understanding frontend-backend data flow.

Ruth Store | React / JavaScript | Live application

- Developed an AI-assisted responsive e-commerce interface for browsing and presenting products, focusing on reusable UI and a clear shopping experience.

Invoice Processing & Shopify SEO Automation

- Created automation workflows to extract, clean, and organize invoice data and automate repetitive browser-based SEO operations.

EDUCATION

Bachelor's Degree in Information and Communication Technology (ICT)
